

BISON LIFE

Reversible 70 Windows

BISON

Reversible 70

A fully reversible window ideal for properties with windows in locations that have restricted access for cleaning.

Product features at a glance

- Comprehensive product range to suit all types of property and space available
- Internal or external glaze fixed light element suits both commercial and residential applications
- Available in both 24mm or 28mm glazing options providing choice in the levels of thermal and sound insulation
- Fully reversible allowing easy cleaning of the outside of the window from the inside
- Reverse functionality operates without entering the property which means there is no disruption to window dressings or cills
- Compatibility across our product range, to ensure consistency in design, installation and finish
- A wide range of colour and woodgrain foil finishes available

Bison specialises in the design, manufacture and distribution of high-quality PVCU-home improvement products throughout the UK.

Operating from a state-of-the-art manufacturing facility, we are now a leading PVC-U home improvement manufacturer. We manufacture all our own products using the market-leading Spectus profile system, so you can rest assured every product you receive is made from the highest-quality materials, using the latest technology.

You want the very best for your home and we're committed to providing the best possible products and service available to ensure your complete satisfaction, not only with your windows, but also with the service you receive from our carefully-selected installation partners.

- Colours and styles to suit any home, property or development
- Superior weather, thermal and sound protection as standard
- Bison manufacture all products under a rigorous quality management system to ensure first-class results every time
