COMPOSITE DOOR SOLUTIONS

**Totally Tailored  
Composite Door Solutions**

"Welcome Home"

# The perfect blend...

## from Entrance Composite Door Solutions

To many people a door is just a way of getting in and out of a property, but to Entrance Composite Door Solutions, it's so much more! It is the Entrance to your home.

First and foremost we provide your home with the security you need. Our doors have been independently tested to exceed the requirements of PAS 24 – The UK security standard for external doors. Our enhanced security GRP doors are supplied with German manufactured multipoint locking systems and high security profile cylinders, an Entrance door is the best way to secure your home.

At Entrance Composite Door Solutions we offer a versatile range of products which includes single doors, sidelights, double doors, stable doors and Fire doors. Our 4 hardware options - Standard, Enhanced, Contemporary & Heritage create ore opportunities for you to personalise your door and with each option having a range of handles, finishes and accessories to choose from the options are endless.

Our extensive collection of door styles offers both traditional and contemporary designs for you to choose from, combined with our selection of chic decorative glass units allow you to tailor your door for the privacy you need.

With 5 standard colours, 2 woodgrain, 36 painted finishes and our EXCLUSIVE stains to choose from, you can add that personal finish to your door, and if that's not enough we can paint to any RAL colour if you can't find the colour you are looking for.

Our brochure is here to guide you towards your perfect Entrance composite door.

Care & Maintenance	65

# Why choose an Entrance Composite door?

## Low Maintenance

An Entrance composite door gives you the aesthetic appeal of a timber door without the worry of swelling or the hassle of painting. Our doors' impact resistant GRP skins have been designed to replicate the grain of an oak tree creating a natural look. Our extensive range of colours are resilient against UV Damage and the internal structure of the door is manufactured from laminated timber which prevents any twisting and warping. The combination of these elements means that our doors come with a 10 year structural and surface finish guarantee.\*

\*see page 67 to see how to care for your Entrance Composite Door

## Superior Security

We take your security seriously, and have had our doors independently tested to PAS 24 and Part Q standards. Each of our hardware options are based around our high security, multipoint locking systems. German manufactured, our locks have passed the rigours of PAS 24 testing and are approved by the Secured by Design policing initiative known for their knowledge in quality and security. As standard, your door will be supplied with the Winkhaus Trulock locking system, along with a Kitemarked security cylinder that protects against burglar attack. We also offer many upgraded hardware options, from an enhanced handle option to automatic locking and electronic access controls.

## Thermal Efficiency

Entrance composite doors have many benefits over timber, PVC and solid timber composite doors, one major advantage is the thermal efficiency of our doors. With energy bills at an uncertainty people more than ever want to make sure they spend their money wisely. With a high-density, foam insulated core, our composite doors have been proven to be 19% more thermally efficient than and 48mm solid timber core composite doors, and 17% more than your traditional timber door. Our doors help keep the heat locked inside your home by preventing heat escaping through your door, therefore decreasing the energy loss and costs!

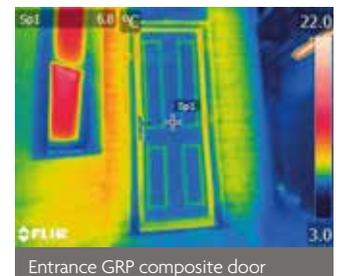

## Tests prove a Entrance GRP Composite Door is -

19%

More thermally efficient than a 48mm solid timber core composite door.

17%

More thermally efficient than a 44mm traditional timber panelled door.

# Bring colour into your life!

## Entrance Palette

We have one of the largest colour palettes in the market, with 5 standard colours, 2 woodgrains, 36 on the shelf paint colours and 6 stains. And if you still can't find the one you like we also offer the choice of ANY RAL.

We also offer the choice to paint your door a different colour each side, so if you would like Chartwell Green on the outside and Cream on the inside, we can paint to your specification.

All of our standard colours have a 10 surface warranty and our hand painted doors have a 10 year paint warranty, so you can be confident your Entrance door will stand the test of time.

*Choose from over 40  
of our favourites or  
any RAL!*

# Hardware Options

At Entrance®, we not only focus on the look of your door, we prioritise your security.

We have 4 hardware options for you to choose from, each of which has a market leading Winkhaus locking system that have all passed vigorous security tests and been approved by the policing initiative. All you need to decide is what handle style you would like.

## Standard Hardware

This package comes as 'standard' with every door, and it is anything but standard. Each door is supplied with the German manufactured, Trulock 3 point locking system which has been tried and tested against forced entry, passing PAS24 testing standards. The lock has been approved by the 'Secured by Design' policing initiative with its deadlocking feature by simply lifting the lever upwards, and safeguarded with a 1\* security cylinder to fight against burglary tactics such as lock picking, snapping and bumping. We offer a range of stylish lever door handles (lever/pad available for extra security externally) and matching furniture\*.

Polished Gold

*Lever Pad version also available*

# Enhanced Hardware

For that extra feel of security for your home, Entrance offer the Enhanced hardware package. Not only does your door come with our high security Trulock locking system, but it is also complimented with an advanced 'Secured by Design' PAS 24 tested security handle. The PAS 24 handle features a specially designed lever to prevent forced entry by breaking the lever, along with a moveable cylinder shroud to avert the assailant from getting to the cylinder. The stylish lever handles are branded with the 'Secure by Design' logo to deter the burglar from trying to gain forced entry, and are available in a range of colours.

**Secured by Design**

**Official Police Security Initiative**

# Heritage Hardware

Nicknamed the 'Heritage' hardware package due to its lock height positioning being common in older houses, this style of hardware is perfect also on our Galaxy doors for a modern twist. The Heritage lock features another of Winkhaus' high security locking systems, the AV2 Autolock. When the door is closed the AV2 automatically drops its high tensile steel hooks, instantly locking your door and securing your home without deadlocking, and your home is only accessible with your key. The unique lock height adds character to your door, and is available with a range of cylinder pulls, and a newly added Contemporary twist with pull handles. The Heritage package also features an upgraded Kitemark approved Winkhaus thumbturn cylinder with anti-bump, anti-snap and anti-drill features to protect against burglar attack.

\*See page 12 for matching furniture options to finish off your door and additional upgrades

# Contemporary Hardware

Give your door the ultimate finish with our Contemporary package. This option includes a Winkhaus AV2 Autolock which locks the door automatically when closed. It drops its high tensile, steel hooks instantaneously to prevent against follow on attacks, and has been accredited by the 'Secured by Design' initiative for its security. The package also provides a high security, Kitemarked Winkhaus thumbturn cylinder to prevent burglary attacks, and the thumbturn allows for easy locking for the inside. Our Contemporary option is the most versatile of our hardware packages, allowing for the option to have a Grade 316 stainless steel pull handle on the external side of the door with a lever on rose handle on the inside, or a pull handle on both sides, depending on your preference. We have over 10 handle variants for you to choose from to compliment your home. All of our pull handles and accessories are finished in Satin Stainless Steel

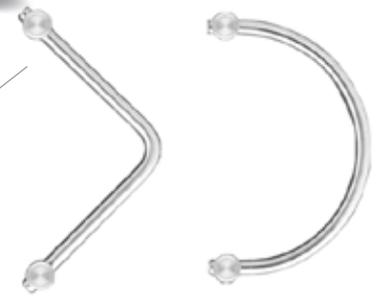

*It's up to You!*

Decide between a lever on rose on the inside or back-to-back pull handles

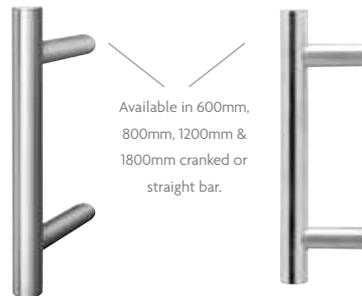

*NEW Square Pull Handle in 700mm, 1200mm & 1500mm*

Our C and V Handles come in 350mm fixing centre size. The perfect way to make your door unique

Available in 600mm, 800mm, 1200mm & 1800mm cranked or straight bar.

Bow handle available as 350mm or 1200mm, cranked or straight.

# The Future of Door Security Today

# Your Finger is the Key!

Featuring a door mounted finger scanner and a Secured by Design approved, electronic multipoint lock, our keyless entry system offers the latest technology in both security and convenience.

With a capacity of holding 99 users, each with multiple fingers, this system offers all the flexibility which you require for your home.

Simple programming either by the integrated control panel or a smartphone app takes this futuristic technology into today's homes

- ✓ **Unrivaled Convenience** - Impossible to lock yourself out as your finger is always on hand!
- ✓ **Maximum Security** - No lost or stolen keys, 1000 times more secure than a 4 digit code & ultimate control of users (no passing of card, key or code)
- ✓ **User Friendly** - Easy administration through integrated panel or smartphone app
- ✓ **Intelligent Software** - Constantly learning everytime when used, therefore detects growth in childrens fingers, minor injuries and user habits

Anthracite Grey as standard

# Composite Fire Doors

Included within our range is a selection of styles of FD30s certified fire doors.

Certified to BS476: Part 22: 1987 our Fire door assemblies have been tested in accordance with the most recent standards for 30 minute fire and smoke resistance and are also capable of achieving PAS024 security standards.

Our FD30s fire door assemblies are supplied with the AV2 auto lock which deploys it's hook locking points automatically when the door is closed. This keeps the door from distorting to heat in the case of a fire, which is common when a lock with only the latch engaged is used. This lock also provides the utmost security for your door against forced entry, especially 'follow-on' attacks as the assailant cannot enter the premises once the door is closed without a key.

Our Fire doors have also been tested with the Kitemarked security Winkhaus cylinder, paired with the Winkhaus Armorshield to fight against burglary attacks such as lock picking, snapping, drilling and bumping – available as internal key or thumbturn operation. The door is operated by the Winkhaus Palladio XL handle, available as lever or pad externally, which has been praised for its design or ease of use, especially for the elderly. Its lever is 20% longer than conventional lever handles which helps reduce the operating forces of high security multipoint locking systems.

# Double Doors

All of our doors within the Gemstone and Galaxy range are available as double doors. We offer a range of hardware types to suit the style of doors for your home, and the security doesn't end at our single doors. Our double door locking systems are German manufactured and have been tested to PAS24 standards, and are approved by the Policing initiative 'Secured by Design'.

*Traditional double door Hardware*

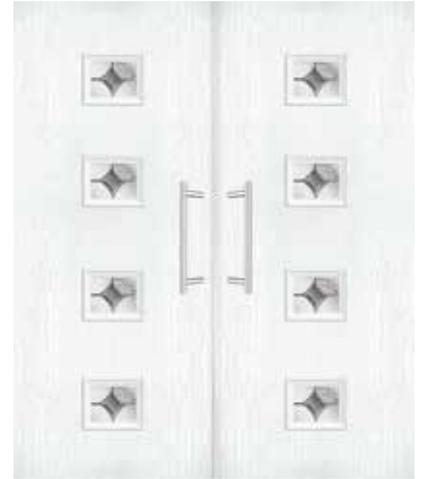

*Make an impression!*

To create an impressive entrance for your home, we have an array of combinations for you to choose from.

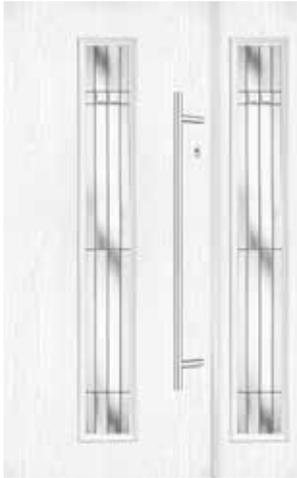

# Contemporary Double Doors

Our contemporary double door package is the most versatile option for you to choose from, with the option of either a lever handle on the master, or any of our contemporary handles (see page 9) on one or both doors. The main difference from the traditional package is that the slave door is not operated by a handle.

The master door features the high security, Winkhaus AV2 lock, as used on our Contemporary hardware single door, along with a high security Kitemarked cylinder. The slave door does not feature a cylinder, and is operated by an integrated flush lever which engages and retracts the top and bottom shootbolts. This 'hidden' lever can only be activated once the master door is in the opened position.

*Contemporary double door Hardware*

*Contemporary Door 7 a Half Option*

This versatile locking system can also be used on a door & half door application when opening sizes dictate that two full size doors will not fit. Our door & half door offering is created using a full size master door and a sidelight for the slave door, our sidelight range can be found on page 55.

## Traditional French Door

The most popular double doors are the traditional French door style. This package features door handles on both doors in a range of colours for you to choose from. The master door, which opens first, features double deadbolts which secure into the slave door whilst the slave door lock operates shoot bolts engaging in the frame at the head and sill. Our traditional French doors are supplied with a pair of Kitemark security cylinders which for your convenience both operate off the same key, these can be upgraded to an internal knob if desired. Each door can operate independently, so you are able to use the master door as a single entry door while the slave door stays locked, or open both for a grand entrance.

# Stable Doors

The Entrance composite stable door range is perfect to bring the countryside feel to your home. The top leaf and bottom leaf can operate individually, allowing the top leaf to be kept open to let fresh air flow through your home, while keeping small pets with muddy paws out. For normal operations the top and bottom doors can be secured together so they work simultaneously therefore functioning as a single functioning door.

The stable door has been constructed specifically for its function, with both the top and bottom leaf constructed with a rigid subframe, providing stability and security, as well as weather protection. Each leaf has its own lock; the top leaf featuring a sprung latch and steel deadbolt operated by a stylish lever handle providing the highest security at the centre of the door, the bottom leaf with a roller latch for easy and convenient functionality to following the top leaf when linked together, locked by key. Hooks are featured at the top and bottom of the door locks.

The top and bottom leaves are connected by a security rack bolt, operated by an oval knob matching your chosen door handle colour\*. Your stable door is finished with a meeting style to weatherproof the centre of your door, along with a rain deflector for both the top and bottom leaf.

To see all of the door designs and glass options, see pages 30 to 37 of the Ruby doors.

## New Collection Sparkling Glass

Once you've chosen your door it's time to turn your attention to the detailing - deciding which glazing perfectly suits your choices, your home and your personality.

A decorative glazing panel adds style and personality to your door whilst letting natural light fill your home. Designed to keep in the warmth and with a large range of different designs, colours and glass patterns to choose from; you are able to give your door the perfect finishing touch.

Our glass provides low maintenance solutions as each pane of glass are triple glazed keeping the decorative glass dust free and prevents lead oxidisation, keeping your glass looking new and sparkling clean. We have a wide selection of glass designs for you to choose from, from traditional to contemporary, colourful to simple, all to suit each style of door.

## Enclosed Mini-blinds

An integrated blind is the perfect solution for controlling light and privacy in your home.

The integrated blinds are available in the Topaz 1 half glazed composite, with Tilt and Raise mechanisms rather than a traditional cord, so is completely safe for use around children.

*Perfect when added

## The Elements Collection

The Elements range is a new and alternative glazing option to transform the look of your door.

This flush-fit system has its own range of door designs coming soon to the Entrance range.

# Care & Maintenance

An Entrance composite door is very low maintenance, but to keep your door like brand new there are a few easy steps to follow:

- Clean surface of door regularly with warm soapy water (e.g. washing up liquid) or specially formulated composite door wipes – ask your installer for more details. Wipe dry with a clean cloth to prevent water marks
- Wash down any handles with warm soapy water and wipe dry with a cloth. For Stainless Steel handles use the provided maintenance cloth to prevent weathering build up doing so will prevent any surface rust deposits, if rust does appear on stainless steel items this is normal and can be removed using a non-abrasive scouring pad such as a 'Brilo' pad
- Locks again should be wiped down when the door is being clean to avoid any surface deposit build up, in addition it is advised that the lock should be lubricated once a year by using a spray lubricant such as 'Brunox Turbo Spray', the provided nozzle can be used to get the lubricant around the locking points without any need to remove the lock from the door
- To keep your glass sparkling, many of our decorative units are triple glazed to prevent dust gathering and oxidation. To freshen up your glass you can either use soapy water and the polish the glass to remove water marks or use a domestic glass cleaner
- Try to avoid aggressive cleaning methods on surface of door such as abrasive cleaners or scouring pads
- High pressure steam cleaners
- Using bleach or solvents (white spirit, methylated spirits, cellulose thinners or acetone) on face of door
- The use of adhesives or any type of tack for temporary decoration
- The contact of sharp objects including excessively long key chains

## *Accidents Happen*

We all know accidental damage happens from time to time. For any slight marks on your composite door please contact your supplier for means of touch up.
